Book Launch for Religious Right: The Greatest Threat to Democracy Local author, and former Religious Righter, exposes their agenda

A.F. Alexander was one of those far right conservative Christians. She even completed a Bible Institute program that ingrained the conservative worldview into her being. She left the movement, after a few decades of ardent involvement, over the position that women should stay with abusive husbands. Initially, she intended to write a clarification of the Bible to New Agers and others who quoted and interpreted the Bible incorrectly – in her mind. She quickly found that she had been an extremist in her own beliefs and the book became an exposé.

Four years, and over sixty reference books later (we aren't even touching on the number of articles), she had systematically presented the Religious Right agenda. "There are a couple of major themes and players that clearly stood out as I researched and pieced their agenda together. One theme that I found very disturbing was the intentional move towards a government and culture solely established upon an extremist view of the Bible, essentially a theocracy, and a deliberate move away from any *consent of the governed*. I felt that deserved to be spotlighted and brought to every citizen's attention."

The book is carefully presented in plain English, and the sections break down the dangers of the Religious Right, to many Christians as well. While there are books on the market that focus on an aspect of the movement, this one outlines the network and their overall strategy, tactics, and steps each person can take to make a difference.

Where: Hooked On Books, 3918 Maizeland Rd

When: Sunday May 20, 2012 3 pm to 5 pm

Author will give a talk on the book and sign books.
