## **Where the War on Women is Coming From**

---

Women are marching in the streets in protest against political maneuvers perceived to shame and subjugate American women. Seemingly overnight birth control has become controversial after over forty years of availability. Political analysts repeatedly proclaim how this “strategy” makes no sense during an election year. But what if it isn’t a political strategy at all, but the result of an extremist agenda? What if it is just one piece of a template for the authentic “traditional family” they envision?

Find out how this battle has been building for decades. Be introduced to the real traditional family values that the Religious Right intends for the nation. Discover how it was never only about abortion, but all contraceptives. This book will explain the political manipulations to control women. It will open your eyes to understand many of the headlines and news items surrounding you daily. This is only one battle in a vast war on our nation and individual rights. There is a war on, but women are just one of the fights being waged.

---

The book is written by an insider who left the Religious Right fold and now shares why they believe they are mandated to have dominion over every aspect of life in the United States. The author exposes how their vision for America is not a democracy at all. A must read.

Well researched with revealing interviews included and current events explained. Never dull and answers all your questions.
